Wireless CarPlay

Wireless CarPlay

CarPlay allows you to use your iPhone intelligently and safely while driving a vehicle. Now, the new CarPlay car dashboard can help you listen to music or programs, use navigation, and get Siri suggestions, the calendar app allows you to browse and manage your all-day itinerary, and the map app can show you surrounding information. I wish you easier and more fun along the way to your destination.

Fix for all car models;

Add Bluetooth function (If original car without Bluetooth function) ;

Easy to install, only needs to be powered by the original car's cigarette lighter.

BMW Comfort Access

BMW Comfort Access is based on the design concept of "safety" as the first element, and aims to provide drivers and car owners with intelligent safety protection during the process of locking the car after getting off the car.

This product adds comfortable entry, automatic window lift, and safety reminder functions on the basis of the original car vehicle, which improves the safety and comfort of the car owners, so that the original car key can not only start the vehicle without key, but also enter and exit the vehicle without key. And make it become the real smart key.
